

EQIP Rubric for Lessons & Units: Science (Version 3.0)

Reviewer Name or ID: Linington/Rees Grade: 1 Lesson/Unit Title: Amplify: Animal and Plant Defenses

Category I: NGSS 3D Design (lessons and units): *The lesson/unit is designed so students make sense of phenomena and/or design solutions to problems by engaging in student performances that integrate the three dimensions of the NGSS.*

Lesson and Unit Criteria Lessons and units designed for the NGSS include clear and compelling evidence of the following:	Specific evidence from materials (what happened/where did it happen) and reviewer's reasoning (how/why is this evidence)	Evidence of Quality?	Suggestions for improvement
<p>A. Explaining Phenomena/Designing Solutions: Making sense of phenomena and/or designing solutions to a problem drive student learning.</p> <ul style="list-style-type: none"> i. Student questions and prior experiences related to the phenomenon or problem motivate sense-making and/or problem solving. ii. The focus of the lesson is to support students in making sense of phenomena and/or designing solutions to problems. iii. When engineering is a learning focus, it is integrated with developing disciplinary core ideas from physical, life, and/or earth and space sciences. 	<p>Ch.1 Lesson 4, 3, 4, 5 Ch.2 Lesson 3, 4, 5</p> <p>Engineering connected to phen.</p> <p>Phenomena: Unit Question + Chapter Phenomena</p>	<p><input type="checkbox"/> None <input type="checkbox"/> Inadequate <input type="checkbox"/> Adequate <input checked="" type="checkbox"/> Extensive</p>	
<p>B. Three Dimensions: Builds understanding of multiple grade-appropriate elements of the science and engineering practices (SEPs), disciplinary core ideas (DCIs), and crosscutting concepts (CCCs) that are deliberately selected to aid student sense-making of phenomena and/or designing of solutions.</p> <ul style="list-style-type: none"> i. Provides opportunities to develop and use specific elements of the SEP(s). ii. Provides opportunities to develop and use specific elements of the DCI(s). iii. Provides opportunities to develop and use specific elements of the CCC(s). <p>Evidence needs to be at the element level of the dimensions (see rubric introduction for a description of what is meant by "element")</p>	<p>Document evidence and reasoning, and evaluate whether or not there is sufficient evidence of quality for each dimension separately</p> <ul style="list-style-type: none"> i. 1-LS1-2 Research 1-LS1-1 design device to solve problem ii. LSI.A LSI.B LSI.D iii. 1-LS1-1 Structure & Function 	<p><input type="checkbox"/> None <input type="checkbox"/> Inadequate <input checked="" type="checkbox"/> Adequate <input type="checkbox"/> Extensive</p> <p>(All 3 dimensions must be rated at least "adequate" to mark "adequate" overall)</p>	<p>doesn't solve new problem - models how & why nature already solved problem</p>

<p>C. Integrating the Three Dimensions: Student sense-making of phenomena and/or designing of solutions requires student performances that integrate elements of the SEPs, CCCs, and DCIs.</p>	<p>Fully integrated new phenom/referenced each lesson</p>	<p> <input type="checkbox"/> None <input type="checkbox"/> Inadequate <input type="checkbox"/> Adequate <input checked="" type="checkbox"/> Extensive </p>	
<p>Rating for Category I. NGSS 3D Design—lessons After carefully weighing the evidence, reasoning, and suggestions for improvement, rate the degree to which there is enough evidence to support a claim that the lesson meets these criteria. <i>if you are evaluating an instructional unit rather than a single lesson, continue on to evaluate criteria D-F and rate Category I overall below.</i></p>	<p>Lesson Rating scale for Category I (Criteria A–C only): 3: Extensive evidence to meet at least two criteria (and at least adequate evidence for the third) 2: Adequate evidence to meet all three criteria in the category 1: Adequate evidence to meet at least one criterion in the category, but insufficient evidence for at least one other criterion 0: Inadequate (or no) evidence to meet any of the criteria in the category</p>		<p>Circle Rating</p> <p>0 1 2 3</p> <p>After rating the lesson, read below for next steps</p>

What’s next if the lesson rating is less than a 2?

If the rubric is being used to approve or vet resources and the lesson or unit does not score at least a “2” in **Category I: NGSS 3D Designed**, the review should stop and feedback should be provided to the lesson developer(s) to guide revisions. If the rubric is being used locally for revising and building lessons, professional judgment should guide whether to continue reviewing the lesson. Categories II and III may be time consuming to evaluate if Category I has not been met and the feedback may not be useful if significant revisions are needed in Category I, but evaluating these criteria in a group may support deeper and more common understanding of the criteria in these categories and more complete feedback to the lesson developer (if they are not in the room) so that Categories II and III are more likely to be met with fewer cycles of revision.

What’s next if the lesson rating is a 2 or 3?

If you are evaluating a lesson that shows sufficient evidence of quality to warrant a rating of either a 2 or a 3 for Category I, proceed to Category II: NGSS Instructional Supports

Category I: NGSS 3D Design (additional criteria for units only):

if you are evaluating a lesson, it is not necessary to evaluate criteria D-F. Please enter your rating for a single lesson above (after C).

Unit Criteria A unit or longer lesson designed for the NGSS will also include clear and compelling evidence of the following:	Specific evidence from materials and reviewers' reasoning	Evidence of Quality?	Suggestions for improvement
D. Unit Coherence: Lessons fit together to target a set of performance expectations. i. Each lesson builds on prior lessons by addressing questions raised in those lessons, cultivating new questions that build on what students figured out, or cultivating new questions from related phenomena, problems, and prior student experiences. ii. The lessons help students develop toward proficiency in a targeted set of performance expectations.	Aquarium Project	<input type="checkbox"/> None <input type="checkbox"/> Inadequate <input type="checkbox"/> Adequate <input checked="" type="checkbox"/> Extensive	
E. Multiple Science Domains: <i>When appropriate</i> , links are made across the science domains of life science, physical science and Earth and space science. i. Disciplinary core ideas from different disciplines are used together to explain phenomena. ii. The usefulness of crosscutting concepts to make sense of phenomena or design solutions to problems <i>across science domains</i> is highlighted.	Life science only blended but not pointed out in lesson no math CCSS no social st CCSS Yes ELA - lots	<input type="checkbox"/> None <input checked="" type="checkbox"/> Inadequate <input type="checkbox"/> Adequate <input type="checkbox"/> Extensive	reference each domain in lesson
F. Math and ELA: Provides grade-appropriate connection(s) to the Common Core State Standards in Mathematics and/or English Language Arts & Literacy in History/Social Studies, Science and Technical Subjects.		<input type="checkbox"/> None <input checked="" type="checkbox"/> Inadequate <input type="checkbox"/> Adequate <input type="checkbox"/> Extensive	
Rating for Category I. NGSS 3D Designed—units After carefully weighing the evidence, reasoning, and suggestions for improvement, rate the degree to which the criteria are met across the unit.	Unit Rating Scale for Category I (Criteria A-F): 3: At least adequate evidence for all of the unit criteria in the category; extensive evidence for criteria A-C 2: At least some evidence for all unit criteria in Category I (A-F); adequate evidence for criteria A-C 1: Adequate evidence for some criteria in Category I, but inadequate/no evidence for at least one criterion A-C 0: inadequate (or no) evidence to meet any criteria in Category I (A-F)		Circle Rating 0 1 2 3

If the rubric is being used to approve or vet resources and the unit does not score at least a "2" overall in Category I: NGSS 3D Design, the reviewer should stop here and feedback should be provided to the unit developer(s) to guide revisions. If the rubric is being used locally for revising and building units, professional judgment should be used on whether or not to continue reviewing the unit. For example, a unit that is weak in one aspect of criterion A, but that the reviewers think is easy to fix, might warrant continued review to provide more complete feedback to the unit developer(s).

Category II: NGSS Instructional Supports (lessons and units): The lesson/unit supports three-dimensional teaching and learning for ALL students by placing the lesson in a sequence of learning for all three dimensions and providing support for teachers to engage all students.

Lesson and Unit Criteria Lessons and units designed for the NGSS include clear and compelling evidence of the following:	Specific evidence from materials and reviewers' reasoning	Evidence of Quality?	Suggestions for improvement
<p>A. Relevance and Authenticity: Engages students in authentic and meaningful scenarios that reflect the practice of science and engineering as experienced in the real world.</p> <ul style="list-style-type: none"> i. Students experience phenomena or design problems as directly as possible (firsthand or through media representations). ii. Includes suggestions for how to connect instruction to the students' home, neighborhood, community and/or culture as appropriate. iii. Provides opportunities for students to connect their explanation of a phenomenon and/or their design solution to a problem to questions from their own experience. 	<p>Aquarium Scientists solve real world problems</p> <p>★ phenomena each Lesson/several design</p> <p>★ send home paper</p>	<p><input type="checkbox"/> None <input type="checkbox"/> Inadequate <input checked="" type="checkbox"/> Adequate <input type="checkbox"/> Extensive</p>	<p>no cultural connection except diverse book characters</p> <p>does not have students come up with problem</p>
<p>B. Student Ideas: Provides opportunities for students to express, clarify, justify, interpret, and represent their ideas and respond to peer and teacher feedback orally and/or in written form as appropriate.</p>	<p>Labels</p> <p>Discussion</p> <p>Explanation / Partner</p>	<p><input type="checkbox"/> None <input type="checkbox"/> Inadequate <input checked="" type="checkbox"/> Adequate <input type="checkbox"/> Extensive</p>	<p>more overt justification opportunities</p>
<p>C. Building Progressions: Identifies and builds on students' prior learning in all three dimensions, including providing the following support to teachers:</p> <ul style="list-style-type: none"> i. Explicitly identifying prior student learning expected for all three dimensions ii. Clearly explaining how the prior learning will be built upon. 	<p>Anecdotal assessments and constant reference to phenomena/ prior activities</p>	<p><input type="checkbox"/> None <input type="checkbox"/> Inadequate <input type="checkbox"/> Adequate <input checked="" type="checkbox"/> Extensive</p>	

<p>D. Scientific Accuracy: Uses scientifically accurate and grade-appropriate scientific information, phenomena, and representations to support students' three-dimensional learning.</p>		<input type="checkbox"/> None <input type="checkbox"/> Inadequate <input type="checkbox"/> Adequate <input checked="" type="checkbox"/> Extensive	
<p>E. Differentiated Instruction: Provides guidance for teachers to support differentiated instruction by including:</p> <ol style="list-style-type: none"> Appropriate reading, writing, listening, and/or speaking alternatives (e.g., translations, picture support, graphic organizers, etc.) for students who are English language learners, have special needs, or read well below the grade level. Extra support (e.g., phenomena, representations, tasks) for students who are struggling to meet the targeted expectations. Extensions for students with high interest or who have already met the performance expectations to develop deeper understanding of the practices, disciplinary core ideas, and crosscutting concepts. 	<p><u>Pedagogy</u> <u>sentence frames</u> <u>visuals</u> <u>word wall</u> <u>role-play</u> <u>visualizing strategy</u></p> <p><i>Spanish</i> <i>classaries</i></p> <input type="checkbox"/> None <input type="checkbox"/> Inadequate <input checked="" type="checkbox"/> Adequate <input type="checkbox"/> Extensive	<p>needs more challenges</p>	<p>Circle Rating</p> <p>0 1 2 3</p>
<p>Rating for Category II: Instructional Supports—lessons After carefully weighing the evidence, reasoning, and suggestions for improvement, rate the degree to which the lesson met this category.</p> <p>If you are evaluating an instructional unit rather than a single lesson, continue on to evaluate criteria F–G and rate Category II overall below.</p>	<p>Lesson Rating scale for Category II (Criteria A-E only):</p> <p>3: At least adequate evidence for all criteria in the category; extensive evidence for at least one criterion</p> <p>2: Some evidence for all criteria in the category and adequate evidence for at least four criteria, including A</p> <p>1: Adequate evidence of quality for at least two criteria in the category</p> <p>0: Adequate evidence of quality for no more than one criterion in the category</p>		

Category II: NGSS Instructional Supports (additional criteria for units only)

if you are evaluating a lesson, it is not necessary to evaluate criteria F–G. Please enter your rating for a lesson above (after E).

Unit Criteria	Specific evidence from materials and reviewers' reasoning	Evidence of Quality?	Suggestions for improvement
<p>A unit or longer lesson designed for the NGSS will also include clear and compelling evidence of the following:</p> <p>F. Teacher Support for Unit Coherence: Supports teachers in facilitating coherent student learning experiences over time by:</p> <ul style="list-style-type: none"> i. Providing strategies for linking student engagement across lessons (e.g. cultivating new student questions at the end of a lesson in a way that leads to future lessons, helping students connect related problems and phenomena across lessons, etc.). ii. Providing strategies for ensuring student sense-making and/or problem-solving is linked to learning in all three dimensions. 	<p style="text-align: center;">*</p> <p style="text-align: center;">lots of modeling</p>	<p><input type="checkbox"/> None</p> <p><input type="checkbox"/> Inadequate</p> <p><input checked="" type="checkbox"/> Adequate</p> <p><input type="checkbox"/> Extensive</p>	<p>more explicit student derived questions for next lesson</p>
<p>G. Scaffolded differentiation over time: Provides supports to help students engage in the practices as needed and gradually adjusts supports over time so that students are increasingly responsible for making sense of phenomena and/or designing solutions to problems.</p>		<p><input type="checkbox"/> None</p> <p><input type="checkbox"/> Inadequate</p> <p><input type="checkbox"/> Adequate</p> <p><input checked="" type="checkbox"/> Extensive</p>	
<p>Rating for Category II: NGSS Instructional Supports—units</p> <p>After carefully weighing the evidence, reasoning, and suggestions for improvement, rate the degree to which the criteria are met across the unit.</p>	<p>Unit rating scale for Category II (Criteria A-G):</p> <p>3: At least adequate evidence for all criteria in the category; extensive evidence for at least two criteria</p> <p>2: Some evidence for all criteria in the category and adequate evidence for at least five criteria, including A</p> <p>1: Adequate evidence for at least three criteria in the category</p> <p>0: Adequate evidence for no more than two criteria in the category</p>		<p>Circle Rating</p> <p style="text-align: center;">0 1 2 3</p>

Category III: Monitoring NGSS Student Progress (lessons and units) The lesson/unit supports monitoring student progress in all three dimensions of the NGSS as students make sense of phenomena and/or design solutions to problems.

Lesson and Unit Criteria Lessons and units designed for the NGSS include clear and compelling evidence of the following:	Specific evidence from materials and reviewers' reasoning	Evidence of Quality?	Suggestions for improvement
A. Monitoring 3D student performances: Elicits direct, observable evidence of three-dimensional learning; students are using practices with core ideas and crosscutting concepts to make sense of phenomena and/or to design solutions.	All 3	<input type="checkbox"/> None <input type="checkbox"/> Inadequate <input type="checkbox"/> Adequate <input checked="" type="checkbox"/> Extensive	
B. Formative: Embeds formative assessment processes throughout that evaluate student learning to inform instruction.	Anecdotal opportunities	<input type="checkbox"/> None <input type="checkbox"/> Inadequate <input type="checkbox"/> Adequate <input checked="" type="checkbox"/> Extensive	
C. Scoring guidance: Includes aligned rubrics and scoring guidelines that provide guidance for interpreting student performance along the three dimensions to support teachers in (a) planning instruction and (b) providing ongoing feedback to students. ✓	no scoring guide list of rubric questions for assessment	<input type="checkbox"/> None <input checked="" type="checkbox"/> Inadequate <input type="checkbox"/> Adequate <input type="checkbox"/> Extensive	needs numbers
D. Unbiased tasks/items: Assesses student proficiency using methods, vocabulary, representations, and examples that are accessible and unbiased for all students.		<input type="checkbox"/> None <input type="checkbox"/> Inadequate <input checked="" type="checkbox"/> Adequate <input type="checkbox"/> Extensive	
Rating for Category III. Monitoring NGSS Student Progress — lessons After carefully weighing the evidence, reasoning, and suggestions for improvement, rate the degree to which the lesson met this category. If you are evaluating an instructional unit rather than a single lesson, continue on to evaluate criteria E-F and rate Category III overall below.	Lesson Rating scale for Category III (Criteria A–D only): 3: At least adequate evidence for all criteria in the category; extensive evidence for at least one criterion 2: Some evidence for all criteria in the category and adequate evidence for at least three criteria, including A 1: Adequate evidence for at least two criteria in the category 0: Adequate evidence for no more than one criterion in the category		Circle Rating 0 1 2 3

Category III: Monitoring NGSS Student Progress (additional criteria for units only)

If you are evaluating a lesson, it is not necessary to evaluate criteria E-F. Please enter your rating for a lesson above (after D).

Unit Criteria A unit or longer lesson designed for the NGSS will also include clear and compelling evidence of the following:	Specific evidence from materials and reviewers' reasoning	Evidence of Quality?	Suggestions for improvement
E. Coherent Assessment system: Includes pre-, formative, summative, and self-assessment measures that assess three-dimensional learning.	good teacher measures	<input type="checkbox"/> None <input type="checkbox"/> Inadequate <input checked="" type="checkbox"/> Adequate <input type="checkbox"/> Extensive	more frequent self-reflection or assessment
F. Opportunity to learn: Provides multiple opportunities for students to demonstrate performance of practices connected with their understanding of disciplinary core ideas and crosscutting concepts and receive feedback	games role play modeling diagrams	<input type="checkbox"/> None <input type="checkbox"/> Inadequate <input type="checkbox"/> Adequate <input checked="" type="checkbox"/> Extensive	
Rating for Category III: Monitoring NGSS Student Progress—units After carefully weighing the evidence, reasoning, and suggestions for improvement, rate the degree to which the criteria are met across the unit.	Unit Rating scale for Category III (Criteria A-F): 3: At least adequate evidence for all criteria in the category; extensive evidence for at least one criterion 2: Some evidence for all criteria in the category and adequate evidence for at least five criteria, including A 1: Adequate evidence for at least three criteria in the category 0: Adequate evidence for no more than two criteria in the category		Circle Rating 0 1 2 3

MISSING from amplify

Overall Summary Comments:
 1. Adequate teacher "mechanics" but could use an end result diagram to keep in mind
 2. ~~0~~
 3. Tech helpful but not essential to concepts developed
 4. Yes

5. Pretty strong problem solving for final project
 6. Closest to Bundle 4 but no sunlight in this Unit but yes (Domains Separate)

Spinning earth limited engineering lots of pencil paper
