Recent Announcements

**NEW!** November 6, 2015 – Apple iOS 8.3 and 8.4 support by AIR for student testing

Apple iOS 8.3 and 8.4 will be supported for testing starting **Monday, November 9**. However, there is a known issue that if a user pushes the 'tab' key while testing, the secure browser crashes. This is not a security risk however it can result in technical difficulties during testing. It is imperative that all schools that choose to utilize iOS 8.3 and 8.4 be aware of this known issue. Apple iOS 9 is not currently supported at this time but will be supported prior to the Spring 2016 Smarter Balanced Summative assessments.
