

WHITWORTH UNIVERSITY

CENTER *for* GIFTED EDUCATION

Ongoing Issues in Identification & Designing Program Services: How Should We Address Them?

Identification of students for gifted services continues to be a concern for many school districts. Join us for a two-day interactive institute to acquire an understanding of the changes to the WACs, best practices regarding identification practices and procedures, and programming options that can be built into a continuum of services for students in your district. Participants will also have time to work on their district plans and receive feedback from the presenters and other participants at the institute.

**Choose the location
most convenient for you!**

Spokane Area Institute

Date: January 27-28, 2014
