

NWESD Fellows

May 18, 2018

JOIN THE WA STATE FELLOWS NETWORK!

The Fellows Network is a group of instructional leaders who help school districts implement the state learning standards in mathematics, English Language Arts (ELA), and science as well as the Early Learning Guidelines. It was established in 2013 by the Office of Superintendent of Public Instruction (OSPI) and the Association of Educational Service Districts (AESD).

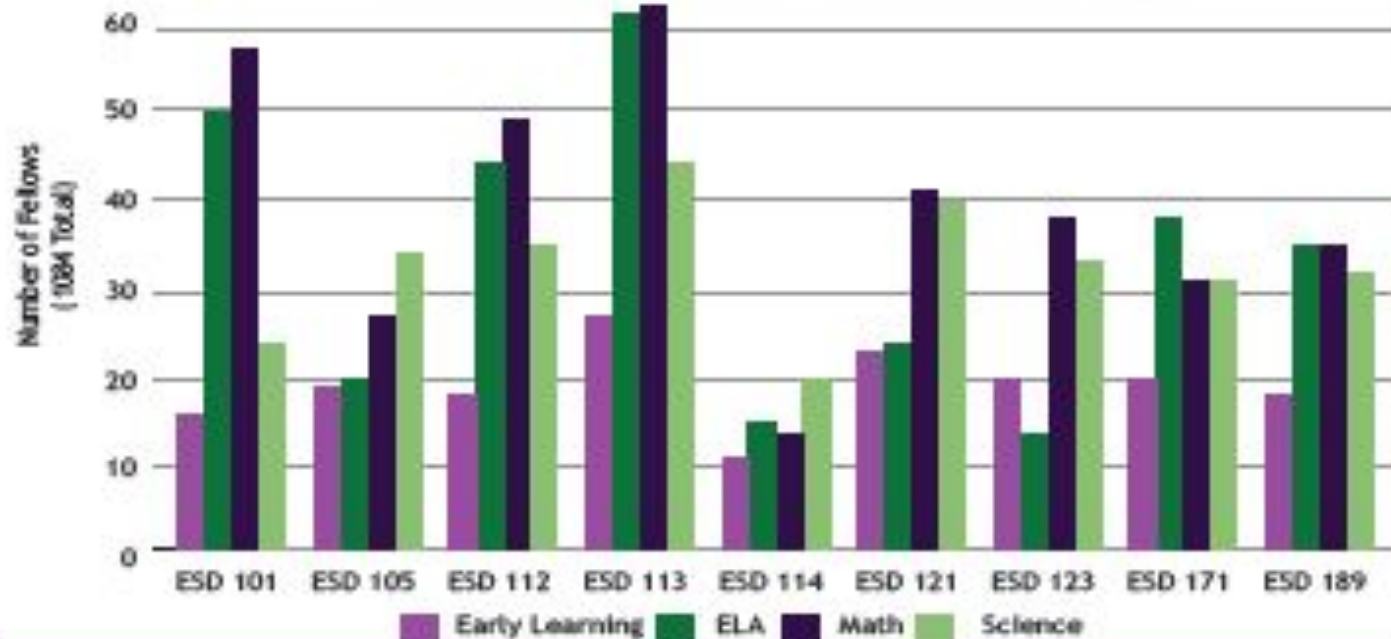

What do the four content areas in the Fellows Network have in common?

Regional ESD Coordinators, in a collaboration with OSPI content-area leadership, convene the Fellows three to four times a year to engage in shared learning. Common to all four areas is a commitment to build content learning and instructional leadership and a focus on equity.

Fellows Overview in Washington State 2017-2018

Fellows At-a-Glance

Washington State Fellows by ESD, Distribution by Content Area

- Meet 4 x a year
- 1084 Fellows in 2017-2018
- All 9 ESD regions across the state
- Math (began 2012-2013)
- ELA (began 2013-2014)
- Science (began 2015-2016)
- Early Learning (began 2016-2017)

2017-2018 Fellows

- Early Learning 14
- English Language Arts 30
- Mathematics 36
- Science 32

NWESD Emeritus Fellows

“It will be exciting to use what we learned over the last three years with the leadership material as well as to have an opportunity to mentor first year Fellows”

- English Language Arts 4
- Mathematics 9
- Science 9

“I want all administrators to watch Jo Boaler!”

School Improvement and Fellows

Where is the Intersection?

As you look at your data, consider who are your teacher leaders who are serving students receiving special education services and emergent bilinguals?

In our planning for next year's Fellows work, we will include an intentional focus on meeting the needs of these diverse learners.
