Learn how to generate reports and use the data that has been entered into Teaching Strategies GOLD to inform your school-wide and/or district-wide supports for Kindergartners, develop targeted interventions, look for trends, monitor progress and share with other administrators, board members, and community.

We'll take time to collaboratively access reports and look at data, reflect on what students in your system are needing now, and begin to develop presentations and plans to support their continued growth.

Recommended for Principals, District Administrators, mentors, coaches, etc.

Four clock hours will be available.
