

Next Steps:

- Read through the book you shared and look at how we can start the process of thinking about a dual language school.
- WABE Dual
- Site visits
- Consider an Enrichment Program (Dual Language)
- Consider pulling/using HS students as an elective credited course and train them to be collaborative teachers to work w/ K-2 teachers as a Dual Language team. We could use high achieving ELL students to work with same L1 students
- How might we bring awareness of dual language benefits to Parent Academy and Parent Advocacy groups?

What information is still needed?

- How does a district get started?
- How did MVSD and B-ESD get started?
- What do I do to get started?
- Has the previous (enrichment) been done before?
- How do you do this when you have pockets of various EL students? (5 of this or 5 of that) not enough to warrant a program
- Can you share a schedule of a particular grade within a dual language school?

How can we best support you?

- Site visit
- Easy simple starting places
- What are my next steps? HELP!
- Keep sharing pragmatic steps to make a Dual Language School
- I am merely a person within large school district and have minimal background with the institutional history and politics. How can I be a positive catalyst for bringing this to our school?
